

## TRL GLOBAL FOUNDATION

### UNIVERSAL TOKEN OF RIGHTS & LIBERTIES

#### The Interests of Partners

##### The Interests of Partners Who Recognise TRL as a Means of Payment

The recognition of the TRL cryptocurrency as a means of payment opens access to trading platforms up to approx. 4.5 billion potential clients (Token of Peace will be distributed free of charge and will be given to every adult citizen on Earth). The issuance and circulation of the cryptocurrency is ensured by a clear and open algorithm, and the way in which the cryptocurrency activity is generated is one of the most humane mechanisms in the history of humanity.

TRL cryptocurrency can be spent on medical and educational services as part of the global TRL Partnership programme, which accredited medical/educational centres across the world will sign up to. One of the most important factors behind the way the TRL algorithms work is independent media and non-profit organisations. The TRL Global Foundation will set aside a significant budget for supporting these organisations across the world.

Expenses from TRL crypto-wallets are controlled by a transaction filter with the aim of preventing spending on goods that are categorised as illegal in the TRL distribution country. TRL is based on blockchain, which means that all operations carried out will be maximally transparent and controlled.

The Token of Peace will go through several stages of development, the end goal of which is to create an international cryptocurrency that is recognised by all countries of the world as a payment system and by the UN as a measure of Rights and Freedoms.

*When recognised as a payment system, TRL affords the exclusive opportunity at an early stage to make your company work globally to achieve goals in the sphere of sustainable development. This is genuine philanthropy, for the good of all humankind.*

As part of the fourth industrial revolution, TRL increases the transparency of the economy and makes it more predictable. The system does away with questions of class divisions and potential political instability, creating a new world.

#### The State's Interests in the Official Recognition of TRL

While creating TRL, we could not ignore the interests of the state, since we are not countering governmental institutions with the Token of Peace, but rather, we are striving to do everything so that every state becomes our ally. The main assumptions regarding the way in which TRL can be useful to states can be seen in the following table.

- A citizen has the right to sell an accumulated portion of TRL to investors, which, from the state's perspective, should be seen as international investments in the national economy (the mechanism will be developed by the Director of the TRL Alliance: Economy 4.0 department and will be presented at a later date).
- The Token of Peace payout algorithm is capable of offsetting a negative forecast due to the mass introduction of artificial intelligence and the disappearance of jobs. Citizens will not remain without a means of existence if the government does not manage to be rebuilt under a new economy.
- In domestic affairs, the Token of Peace is an incredibly powerful checks and balances tool that prevents foreign interference, as it is based on internal processes only: the country's treatment of its citizens; fair courts; respect for individuals.

- TRL is capable of having a positive impact on the fight against poverty and mass migration, as it will be accrued according to the principle of the longest possession of citizenship.
- High-quality identification/verification mechanisms have been integrated into TRL and, as per the justified request of authorities, we are providing data regarding system-users' activity\*. TRL fulfils the requirements of the OECD in regard to the de-anonymisation of transactions, complies with AML/KYC policy, and promptly responds to changes in European Union directives.
- The Token of Peace is a derived product with the technological basis for the allocation of public finances and an option for the future development of public social welfare.
- Registration of the organization in multiple jurisdictions and the conclusion of an MOU with the local authorities in the area in which it will be registered.
- TRL solves the majority of the problems described in the recent Club of Rome document 'Come on!', and it means that those states, which recognise TRL as a means of payment, can solve global tasks through the most progressive method.

\*Countries with a TRL-Rate of 70 or higher will receive the greatest loyalty in terms of their cooperation with TRL Global Foundation on these issues

Therefore, Roadmap means the entering and recognition of TRL by the UN, as a mechanism should emerge which equates any infringement on rights and liberties, and the crypto-activity representing them, to crimes against humanity.

Furthermore, the instinct of self-preservation regarding ethical concerns within society as a whole demands the voluntary participation of every TRL owner in the enabling of the search for and capture of people who are trying to commit burglary, theft and other actions which have a negative effect on the work of Token of Peace. Everyone should understand the simple truth: trying to damage the TRL mechanism harms 8 billion people and therefore, one will not be able to feel calm in any part of the world. However, the desire to find and report all discovered mistakes at any stage of the creation, delivery and distribution of TRL should be welcomed by the global society.

Our Tokens can only generate a tax base if the state itself imputes it to its residents. \*

\*In agreement with smart-contracts, the tax collected from TRL must not be included

- in the defence budget
- in the payment of the bureaucratic apparatus
- in state subsidies

The tax collected from TRL should be allocated to\*

- the financing of the education sector (this includes the payment of teaching staff; the construction of new schools; the modernisation of the education system; the financing of the pre-school education system)
- the financing of medical programmes
- this list will be added to/amended in due course

\*The effectiveness of these programmes is agreed with the relative departments (TRL Education; TRL Healthcare; TRL Demography etc.)

---

*TRL Global Movement Team*
